Key facts

All business sectors achieve positive organic sales growth, posting market share gains across the board

All business sectors post significant EBIT margin improvement

Net debt reduced to 1.9 billion euros

\(^1\) Adjusted for one-time charges (0 million euros)/one-time gains (0 million euros) and restructuring charges (90 million euros).
Major events

Pursuing the further consolidation and optimization of our worldwide production network, we laid the foundation stone in Shanghai for the construction of our largest industrial adhesives factory anywhere in the world. From the end of 2012, this ultra-modern facility will be primarily employed to satisfy the rising demand for industrial adhesive technologies in China and the entire Asia-Pacific region, thus contributing to the further expansion of our position in the growth regions. Through ongoing development of our production processes, we have been able to design a plant that will operate with significantly lower water and energy consumption and generally reduced CO₂ emissions.

For the fifth year in a row, Henkel has been declared sector leader in the “Fast-Moving Consumer Goods” category in both the Dow Jones Sustainability World Index and the Dow Jones Sustainability Index Europe. The indices are comprised of corporations that follow the principles of sustainable development in their business operations.

Effective October 1, 2011, Kathrin Menges was appointed as a new member of the Henkel Management Board. She takes over global executive responsibility for Human Resources.

Share performance

During the third quarter of 2011, share prices on the stock markets generally experienced falls in the double-digit percentage range. With the debt crisis deepening in the course of the three months, the DAX underwent a decrease of 25.4 percent while the Dow Jones Euro Stoxx Consumer Goods Index lost 20.0 percent.

Within this market environment, the price of Henkel preferred shares fell by 16.4 percent, from 47.87 euros to 40.00 euros. Our shares were thus able to better withstand the general decline than the DAX and peer stocks representing the consumer goods segment.

The premium generated by the preferred share compared to the ordinary share during the third quarter averaged 22.4 percent.

Results of operations

We achieved an increase in sales of 1.7 percent to 4,028 million euros in the third quarter of 2011. After adjusting for foreign exchange, sales improved by 5.7 percent. With growth of 6.5 percent, organic sales – i.e. sales adjusted for foreign exchange and acquisitions/divestments – once again experienced a strong increase compared to the prior-year quarter.

\(^1\) Calculated on the basis of units of 1,000 euros.

The Adhesive Technologies business sector achieved a strong organic sales increase of 8.7 percent, attributable both to volume growth and successfully implemented price rises. We were able to further expand global market share in all three business sectors.

The third quarter of 2011 saw no major changes in our sales markets, nor were there any significant shifts in our competitive positions from those described in our Annual Report 2010 (starting on page 66).

In order to continuously adapt to our markets and customers, we increased our restructuring charges from 26 million euros to 90 million euros, with the focus primarily on Western Europe and North America. We are further expanding our shared service centers, reorganizing our Laundry & Home Care business sector for enhanced efficiency, and further optimizing the production network serving our Adhesive Technologies business sector.

In the following, we discuss our operating income and expense items up to operating profit, adjusted in each case for one-time charges / gains and restructuring charges. The reconciliation statement and the allocation of the restructuring charges between the various items of the income statement can be found on page 25.

Due to raw material price rises, the cost of sales increased compared to the prior-year figure by 4.2 percent to 2,187 million euros. Gross profit decreased to 1,841 million euros; as a result, gross margin declined by 1.3 percentage points to 45.7 percent. The negative impact amounting to some 600 basis points caused by increases in cost of sales was offset by about 75 percent through increases in our selling prices, savings generated by our cost-reduction measures, and our strict ongoing focus on efficiency improvements in production and along the supply chain.
Marketing, selling and distribution expenses decreased by 6.3 percent to 1,018 million euros; this was essentially due to shifts in the marketing budgets of the consumer goods businesses. Total expenditure on marketing and promotional activities, on the other hand, remained unchanged in the year-on-year comparison. We spent 94 million euros on research and development, representing 2.3 percent of sales. As a result of expansion of our shared service centers, administrative expenses expressed as a proportion of sales came in at 4.4 percent, slightly below the 4.6 percent of the third quarter of 2010.

The balance of other operating income and charges fell from 16 million euros to –9 million euros, due in part to higher expenses relating to other periods and lower gains resulting from the reversal of provisions.

Adjusted operating profit (EBIT) increased by 4.7 percent, from 517 million euros to 541 million euros, with all three business sectors contributing. Despite the influence of rising prices for raw materials and packaging, we were able to increase the Group’s return on sales from 13.0 percent to 13.4 percent. The most pronounced improvement in EBIT margin was realized by the Cosmetics/Toiletries business sector with an increase from 13.6 to 14.3 percent, achieved through excellent sales performance coupled with strict ongoing cost management. Adhesive Technologies was also able to substantially improve its return on sales, from 13.8 percent to 14.4 percent, as a result of both increases in its selling prices and efficiency enhancements. Thanks to higher selling prices and strict ongoing cost management, we also generated an improvement in the EBIT margin of the Laundry & Home Care business sector of 0.4 percentage points to 14.0 percent.

At –37 million euros, our financial result remained at the level of the prior-year quarter. The tax rate amounted to 24.2 percent (adjusted: 26.0 percent). Net income for the quarter decreased by 8.5 percent, from 343 million euros to 314 million euros. After deducting income of 7 million euros attributable to non-controlling interests, net income for the quarter was 307 million euros (prior-year quarter: 337 million euros). Adjusted net income for the quarter after deducting non-controlling interests was 366 million euros compared to 349 million euros in the prior-year quarter. Earnings per preferred share (EPS) decreased from 0.78 euros to 0.71 euros. After adjustment, EPS was 0.85 euros versus 0.80 euros in the prior-year quarter.
Regional performance

The following is a commentary on the reported results:

In the highly competitive environment of the Western Europe region, we improved sales organically by 3.8 percent compared to the third quarter of 2010. The main driver was sales growth in Germany. Despite the increasing severity of the financial crisis in Southern Europe, growth in Italy was particularly gratifying.

Adjusted for foreign exchange, operating profit in the region decreased by 15.9 percent. This was attributable to the disproportionately high restructuring charges attributable to the Western Europe region. Regional return on sales fell accordingly, by 2.7 percentage points to 11.9 percent.

Organic sales in the Eastern Europe region rose by 10.3 percent with our businesses in Turkey and also our adhesives operation in Russia making a particularly important contribution.

Adjusted for foreign exchange, operating profit within the region increased by 10.6 percent. Return on sales remained stable at 15.7 percent.

Expansion of our sales in the Africa/Middle East region continued to be hampered by political unrest in some countries. Nevertheless, we returned to double-digit organic growth with an increase of 13.1 percent. Our adhesives business made a particularly strong contribution to this improvement in performance.

After adjusting for foreign exchange, the region’s operating profit rose by 19.1 percent. Return on sales increased slightly by 0.1 percentage points to 8.5 percent.

Organic sales in the North America region grew by 4.0 percent, despite sluggish consumer spending in the USA.

After adjusting for foreign exchange, operating profit in the region increased by 15.1 percent, despite restructuring charges. Return on sales rose from 10.0 percent in the prior-year quarter to 11.1 percent this time.
We increased organic sales in the Latin America region by 11.0 percent, with business performance in Mexico and Venezuela a major contributor.

Adjusted for foreign exchange, operating profit rose by 12.5 percent. The region's return on sales improved slightly by 0.1 percentage points to 9.8 percent.

Within the Asia-Pacific region, developments in Japan exerted a dampening influence on local revenue growth. Nevertheless, with a rise of 7.6 percent, the region again posted a positive overall performance in terms of organic sales growth, supported in particular by the double-digit rates of increase achieved in China and India.

After adjusting for foreign exchange, operating profit fell by 9.6 percent, due largely to the events in Japan. Return on sales decreased correspondingly, by 2.1 percentage points to 12.9 percent.

Revenue expansion was again given a particular boost by our performance in the growth regions of Eastern Europe, Africa/Middle East, Latin America and Asia (excluding Japan). We were able to increase sales in these emerging markets by 3.4 percent to 1,713 million euros, representing 43 percent of Group sales (third quarter 2010: 42 percent). Maintaining the recent series of double-digit improvements, organic growth came in at 10.9 percent, thanks in particular to the sales performance of Adhesive Technologies and Cosmetics/Toiletries.

Encouraging momentum in organic sales development came from the growth regions of Eastern Europe, Africa/Middle East and Latin America. The Africa/Middle East region continued its recovery following the political upheavals, once again contributing to organic growth with a high single-digit growth rate. The engines of growth in Eastern Europe were Russia, Poland and Turkey. Organic growth in Latin America was positively influenced by Persil, which we launched in Mexico at the beginning of the year. Despite a continuously declining market, organic sales in North America in the third quarter were again higher than in the prior-year period. In Western Europe too, we achieved an increase in revenue – supported in particular by continued strong growth in Germany and encouraging developments in Italy. Having increased sales in still contracting markets, we again expanded our global market shares in the third quarter of 2011, with substantial increases particularly in Germany, Eastern Europe and the

Organic sales of the Laundry & Home Care business sector – i.e. sales adjusted for acquisitions/divestments and foreign exchange – grew in the third quarter by 3.8 percent. We were able to further augment the positive price developments from the second quarter, with the result that the entire organic growth generated in the third quarter was price driven. Despite a slight decline in our relevant markets, volumes remained at the level of the prior-year quarter.

Innovation

Perwoll with “Re-new Effect”

The innovative “Re-new Effect” in the Perwoll delicates detergent formulations “Brilliant Colors,” “Intensive Black” and “Radiant White” smoothes roughened textile fibers, bringing lustrous life to dull shades. Only smooth fibers can optimally reflect the light, causing colors to once again radiate. Perwoll is currently being launched with these new formulations in the main markets of Western Europe.

For further information relating to our product innovations, please take a look at our “Innovation Letter” on our Investor Relations website: www.henkel.com/ir
USA, laundry products doing especially well in the case of the latter.

We were able to further increase adjusted operating profit (EBIT). At 14 percent, adjusted return on sales exceeded the level for the prior-year quarter and was also a whole percentage point higher than the figure for the second quarter of 2011. Once again, the third quarter was burdened by high raw material prices. However, with price increases of our own and ongoing measures to reduce cost and increase efficiency in both production and supply chain, we succeeded in largely offsetting the impact of the rise in material costs on gross margin. Return on sales further improved as a result of cost reductions. Return on capital employed (ROCE) rose from 20.6 percent in the third quarter of 2010 to 21.9 percent this time. Based on adjusted operating profit, ROCE underwent an even greater increase. Net working capital as a proportion of sales once again decreased substantially to the point where it moved into the negative. This was due in particular to ongoing improvements in the management of customer accounts receivable and a rise in trade accounts payable.

Again in the third quarter, the Laundry business sector put in a very strong performance, with the greatest growth momentum once more emanating from our heavy-duty detergents. Here, our core brand Persil again delivered a double-digit growth rate supported by strong business in Germany and the successful market launches of Persil in Mexico and South Korea. Innovative product launches also boosted sales. One example is Persil Black-Gel which we successfully introduced in Western Europe in the second quarter. In addition, our Perwoll specialty detergents for delicate fabrics are now available with the innovative "Re-new Effect" (see "Innovation" below left). The positive trend enjoyed by our softeners was further boosted by the successful launch of Purex Crystals in the USA at the beginning of the year. Innovative variants of Vernel, particularly those related to hygiene and purity, also contributed to this positive performance.

Organic sales of our Home Care business fell just short of the level of the prior-year quarter, as our air freshener business in North America suffered a decline due to a markedly adverse market development. However, we were able to generate significant increases in revenue with our WC products, particularly Bref Power Active, known as WC Frisch Kraft Aktiv in Germany. Sales of our machine dishwasher products also showed encouraging development, benefiting from the launch of Somat 10 in Germany. With its instant-active formula, Somat 10 dissolves faster, enabling it to develop its strong cleaning performance in the dishwasher right from the start. And at all wash settings, too: thanks to the low-temperature activator, Somat 10 is effective even at 40 degrees Celsius, improving the protection of glassware and dishes while also saving energy.

Outlook
We expect market conditions to remain difficult in 2011. We intend to further expand our world market position and, in terms of organic sales growth, to once again outperform our relevant markets, which we expect to slightly decline. With the selling price increases already implemented and those still planned, and with our continued effort to enhance efficiency and reduce cost, we expect – despite the persistently high material prices – to achieve an improvement in adjusted return on sales versus the prior-year figure (2010: 13.0 percent).

\(^{1}\) Calculated on the basis of units of 1,000 euros.

The third quarter again saw the Cosmetics/Toiletries business sector continue its upward growth curve. As in the previous quarters, organic growth – i.e. sales growth adjusted for acquisitions/divestments and foreign exchange – outstripped the relevant markets, coming in this time at 5.6 percent. Despite the persistently difficult and intensely competitive market environment, we were able to further expand our market shares. With prices slightly below the level of the prior-year quarter, organic growth was driven by significant volume expansion, backed up by a strong innovation program.

All our regions contributed to the substantial increase in revenue. Once again, the strongest rises were registered by the growth regions of Eastern Europe, Africa/Middle East, Latin America and Asia (excluding Japan), with the overall increase once again in the double-digit percentage range. Development in China was particularly dynamic with a strong core business being boosted by numerous new product launches. We were also able to increase sales in the mature markets. Aside from substantial revenue growth in Western Europe, North America also showed encouraging developments, outgrowing the relevant markets compared to the prior-year quarter.

Innovation

Osis Style Shifters

Osis, the supercool styling brand from Schwarzkopf Professional, offers innovation aplenty – this time with unique, neon-like packaging and equally striking performance: anywhere, any time, Style Shifters with their tactile textures generate amazing sculpting effects. Thanks to a new liquid polymer technology, hair can be remolded in an instant.

www.schwarzkopf-professional.com

For further information relating to our product innovations, please take a look at our "Innovation Letter" on our Investor Relations website.

www.henkel.com/ir
Adjusted operating profit (EBIT) rose in the third quarter by a very strong 7 percent to 123 million euros, while adjusted return on sales increased to a new high of 14.3 percent, representing an appreciable improvement of 0.7 percentage points versus the prior-year quarter. Our ongoing measures to reduce costs and increase efficiency in both production and supply chain enabled us to partially offset the impact on gross margin arising from the persistently high prices for raw materials and packaging. We were able to further improve our EBIT margin through additional cost savings. Return on capital employed (ROCE) increased by 0.7 percentage points to 22.0 percent. Aside from the improvement in our operating profit, this high value was also the result of a further reduction in our capital base. Net working capital as a proportion of sales was slightly above the ratio prevailing in the prior-year quarter.

Sales of our Branded Consumer Goods business again rose substantially in the third quarter, with our hair segment once again driving growth. We expanded our market shares in Western Europe, Eastern Europe, Latin America, Africa/Middle East and Asia-Pacific. In the Hair Care category, Oil Elixir was launched as a care product under the Gliss Kur brand, following the success of the Ultimate Repair line. In the Colorants business, the successful roll-out of the new subline Syoss Mixing Colors generated additional growth momentum. After a further increase in market share in Western Europe, Syoss is now the number one colorant brand in several countries. In the Hair Styling category, the international introduction of Taft Heidi’s Heat Styles contributed to a positive performance. Meanwhile, in the Body Care business, special mention must be made of the Fa brand which achieved a double-digit increase in sales. This was driven by strong growth in the existing portfolio, augmented by the further roll-out of the new product innovation Fa NutriSkin. Even in the fiercely competitive German market, we therefore achieved an excellent market share with this product. Supported by numerous activities, we have now successfully introduced Right Guard, our men’s brand, into the Africa/Middle East region. The brand has also achieved a very good UK market share with innovations such as Xtreme Dry. The focus of our Right Guard operation in North America was on establishing innovative Right Guard 5-in-1 Bodywash.

The Hair Salon business continued to generate very high growth in the third quarter of 2011, following on from the positive performance of previous quarters. Driving this ongoing success were again the growth regions of Eastern Europe, Africa/Middle East, Latin America and Asia-Pacific (excluding Japan), with double-digit growth rates across the board. Significant growth momentum was generated by, in particular, [3D]Mension, a purely salon brand especially developed to fulfill all the needs of men’s hair care. The strong growth achieved was supported by the successful market launch of Osis Style Shifters, a styling spray providing hold and control (see “Innovation” below left).

Outlook
We expect market conditions to remain difficult in 2011. With our ongoing innovation offensive, we intend to further expand our worldwide market positions, again aiming to organically outperform our relevant markets, which we expect to remain flat at best. With our continuing activities aligned to improving our cost structure, we expect to achieve an improvement in adjusted return on sales versus the prior-year figure (2010: 13.3 percent), despite the persistently high material prices.

In this third quarter of 2011, quarterly sales of the Adhesive Technologies business sector passed the 2 billion euro mark for the first time. As a consequence, our adhesives business once again significantly outperformed its relevant markets, with organic sales – i.e. sales adjusted for acquisitions/divestments and foreign exchange – rising by 8.7 percent. This positive development was driven by both volume increases and successfully implemented price rises.

All our regions contributed to the encouraging growth achieved. In addition to a significant increase in sales in the mature markets, appreciable momentum was also once again generated in the growth regions, with Africa/Middle East and Eastern Europe – driven by Russia particularly – again exhibiting the highest growth rates for the quarter. Sales growth in the emerging markets of Asia (excluding Japan) and Latin America likewise accelerated significantly.

Adjusted operating profit (EBIT) improved considerably compared to the prior-year quarter, rising 8.6 percent to 291 million euros. We were able to largely offset the substantial increases in raw ma-

Innovation

Aerodag Ceramishield

The ceramic coating Aerodag Ceramishield offers long-term spatter protection for MIG/MAG welding equipment. This silicone-free substance significantly reduces the adhesion of molten particles of the kind caused when metals are welded. Compared to conventional weld protection sprays, Aerodag Ceramishield is able to reduce costs by 40 percent and lost time by 7 percent.

For further information relating to our product innovations, please take a look at our "Innovation Letter" on our Investor Relations website: www.henkel.com/ir
material and packaging prices through price increases of our own, and by reducing costs and enhancing efficiency. Consequently, adjusted return on sales improved to a new high of 14.4 percent. At 14.5 percent, return on capital employed (ROCE) underwent a slight improvement versus the prior-year quarter. The ratio of net working capital to sales increased compared to the previous year.

Sales of the Adhesives for Consumers, Craftsmen and Building business increased by a double-digit percentage rate in the reporting period, thus contributing substantially to the encouraging performance levels achieved. The highest sales growth rates occurred in the regions of Africa/Middle East and Eastern Europe.

The Transport and Metal business likewise continued its very positive sales performance. We again registered a strong increase in sales in the growth regions. And in Western Europe too, this business performed particularly well with double-digit growth.

In the General Industry segment, all the regions contributed to the strong growth achieved. In Africa/Middle East, Eastern Europe and Latin America, however, this business performed especially well.

The strongest sales growth rate was posted by the Packaging, Consumer Goods and Construction Adhesives business, the highest rates of increase being generated in the growth regions. This business also performed very encouragingly in North America.

Sales of the Electronics business came in slightly below the level of the prior-year quarter. While our activities in North America particularly generated positive momentum, the Asia-Pacific region experienced a slight decline.

In order to promote the development of further innovative technologies in the flexible electronics domain, we have entered into a cooperation agreement with the Holst Centre, an open innovation initiative of the research organizations imec (Belgium) and TNO (Netherlands). The joint research program will be geared in part to developing new adhesive technologies and applications for large-area organic photovoltaic modules and also for OLED electro-luminescent screens and signage.

Outlook
We expect all the markets of relevance to us to expand at roughly the same rate as in the previous year, i.e. with growth in the low single-digit percentage range. Limited capacities among some manufacturers could again lead to supply shortages. Following a very successful 2010, our aim is to continue generating profitable growth in 2011. We intend to once again outperform our relevant markets in terms of organic sales growth. As a result of the substantial improvement in our cost structure, we expect adjusted return on sales to exceed that of the previous year (2010: 12.8 percent).
Nine-month financial report 2011

Underlying economic conditions
World economic growth decreased over the first nine months of this year to around 3 percent. With a good 6 percent increase, industrial production expanded more than twice as fast as private consumption, which grew by some 2.5 percent (all figures based on Feri EuroRating Services data).

Persistently high risks emanating e.g. from the debt crisis in Europe and North America adversely affected economic development and also had an increasingly erosive effect on investor and private consumer confidence.

From January through September 2011, the US economy only experienced a small degree of growth. In the year-on-year comparison, there was a rise in economic output of about 2 percent. Japan's economy shrank by around 1 percent in the aftermath of the natural disaster.

Economic performance within Western Europe was generally weak in the nine-month period. As a result of a plus of 3 percent in Germany, the region was nevertheless able to achieve growth of 1.5 percent. Meanwhile, the crisis in Southern Europe worsened. In Eastern Europe, economic recovery continued with growth of around 3.5 percent.

Latin America posted strong growth of almost 5 percent. Asia's emerging markets increased their economic output by around 7 percent, with India and China continuing to set the pace.

The euro appreciated somewhat in the year-on-year comparison, from 1.32 to 1.40 US dollars related to the first nine months of 2011. Inflation has accelerated noticeably in many regions. Globally, consumer prices rose by around 4 percent. Global unemployment decreased slightly in the first nine months compared to the corresponding prior-year period.

Sectors of importance for Henkel
The rise in private consumption has remained sluggish. Consumers in the USA increased their spend by around 2 percent in the first nine months of this year. In Western Europe, consumer spending was only marginally above that of the prior-year period, buoyed primarily by Germany. The emerging markets exhibited a greater propensity to consume with a plus of a good 5 percent.

Once again, industrial production expanded faster than overall economic growth. The growth drivers were the electrical engineering and electronic industries, the transport sector and metal processing. Each saw output rise by between 7 and 8 percent. Developments in the consumer-related segments such as the packaging industry were more modest, with increases of around 3 percent. Construction growth was also disappointing during the first nine months of this year, coming in at around 1 percent.

Effects on Henkel
Despite losing momentum, general economic development in the first nine months of 2011 had a positive effect overall on Henkel's business performance: robust economic activity in many regions of the world was reflected in a disproportionately strong increase in organic sales of 6.6 percent, with our growth regions making a particularly important contribution.

Growth in private consumption has had a positive impact on our consumer goods businesses, while the Adhesive Technologies business sector benefited from the relatively strong upturn in industrial production.

The effects of the persistently high raw material prices have been very much felt by all three business sectors.
Business performance January – September 2011

Key financials\(^1\)
Sales 11,363 11,804 3.9 %
Operating profit (EBIT) 1,344 1,418 5.5 %
Adjusted\(^2\) operating profit (EBIT) 1,414 1,528 8.0 %
Return on sales (EBIT) 11.8 % 12.0 % 0.2 pp
Adjusted\(^2\) return on sales (EBIT) 12.4 % 12.9 % 0.5 pp

Results of operations
We increased sales by a 3.9 percent to 11,804 million euros in the first nine months of 2011, Adjusted for foreign exchange, sales improved by 6.2 percent. With growth of 6.6 percent, organic sales – i.e. sales adjusted for foreign exchange and acquisitions/divestments – increased strongly compared to the prior-year period.

Sales development\(^3\)
in percent 1–9/2011
Changes versus previous year 3.9
Foreign exchange – 2.3
After adjusting for foreign exchange 6.2
Acquisitions/divestments – 0.4
Organic 6.6
of which price 2.2
of which volume 4.4

Due primarily to raw material price rises, the cost of sales rose versus the prior-year period by 6.8 percent to 6,363 million euros. Gross profit increased to 5,441 million euros; however, gross margin declined by 1.5 percentage points to 46.1 percent. The negative impact amounting to some 500 basis points caused by increases in cost of sales was offset by about 75 percent through increases in our selling prices, savings generated by our cost-reduction measures and our strict ongoing focus on efficiency improvements in production and along the supply chain.
Marketing, selling and distribution expenses amounted to 3,120 million euros, a decrease of 2.4 percent compared to the prior-year period. We spent a total of 297 million euros on research and development, keeping the R&D ratio expressed as a proportion of sales constant at 2.5 percent. As a result of expansion of our shared service centers, administrative expenses expressed as a proportion of sales amounted to 4.6 percent, slightly below the nine-month level of the previous year.

The balance of other operating income and charges increased from 40 million euros to 47 million euros.

Adjusted operating profit (EBIT) rose by 8.0 percent, from 1,414 million euros to 1,528 million euros, with particular contributions coming from the Adhesive Technologies and Cosmetics/Toiletries business sectors. The Group’s return on sales rose from 12.4 percent to 12.9 percent, as a consequence of both increases in its selling prices and ongoing efficiency enhancements. In the Laundry & Home Care business sector, we were able to increase our EBIT margin by 0.1 percentage points to 13.1 percent, despite rising material prices.

Our financial result improved from –126 million euros to –115 million euros, due primarily to a reduction in net debt. The tax rate amounted to 24.9 percent (adjusted: 26.1 percent). Net income for the nine months increased by 10.1 percent, from 889 million euros to 979 million euros. After deducting income of 21 million euros attributable to non-controlling interests, net income for the nine months was 958 million euros (prior-year period: 869 million euros). Adjusted net income for the nine months after deducting non-controlling interests was 1,023 million euros compared to 922 million euros in the prior-year period. Earnings per preferred share (EPS) rose from 2.01 euros to 2.22 euros. After adjustment, EPS came in at 2.37 euros versus 2.13 euros in the prior-year period.
Comparison between actual and forecasted business performance

In our report for the second quarter of 2011, we published guidance for the current year stating that we expected to again outperform our relevant markets in terms of organic sales growth, and that we anticipated generating growth of around 5 percent. We forecasted an increase in adjusted return on sales (EBIT) to around 13 percent, and also a rise in adjusted earnings per preferred share of about 10 percent.

Based on the gratifying sales performance achieved in the first nine months of 2011, we now expect an increase in organic sales of between 5 and 6 percent for fiscal 2011. We confirm our forecast for adjusted return on sales (EBIT) of around 13 percent and an increase in adjusted earnings per preferred share of about 10 percent.

Net assets

Compared to year-end 2010, total assets increased by 0.7 billion euros to 18.2 billion euros. Under non-current assets, intangible assets declined by 129 million euros, due primarily to currency translation effects. The slight decrease in the property, plant and equipment figure resulted from our capital expenditures of 263 million euros being outweighed by the combined effect of depreciation in the amount of 230 million euros and a negative foreign exchange impact of 39 million euros. Under current assets, which expanded from 5.9 billion euros to 6.7 billion euros, the growth in our business volume was reflected in both higher inventories and an increase in trade accounts receivable. Liquid funds rose by 309 million euros due to a strong net cash inflow in the third quarter.

At 8.279 million euros, equity including non-controlling interests remained roughly at the level of the end of fiscal 2010. The individual components influencing equity development are shown in the statement of changes in equity on page 27. The main downside effect emanated from the lower US dollar exchange rate that has prevailed since the beginning of the year. At 45.5 percent, the equity ratio (equity as a percentage of total assets) stayed virtually constant.

At 5.4 billion euros, non-current liabilities were above the level at year-end 2010 due to a decline in the value of securities and the burdening effect this had on pension funds, leading to higher pension provisions. As in the previous quarter, our non-current borrowings continue to be made up from three bonds – two senior bonds with a redemption value of 1.0 billion euros each, and a hybrid bond with a redemption value of 1.3 billion euros. Under current liabilities, which increased slightly to 4.5 billion euros, trade accounts payable amounted to 2.557 million euros, representing an increase versus the end of 2010 that matched developments in current assets. However, this was countervailed by a further reduction in current borrowings of 64 million euros to 472 million euros.

¹ Including assets held for sale.
Net debt as of September 30, 2011 amounted to 1,859 million euros, a decrease of 484 million euros versus the figure at December 31, 2010 (2,343 million euros). For the first time since the acquisition of the National Starch businesses in 2008, therefore, it is now once again below the 2 billion euro mark. As a result of the reduced level of indebtedness, operating debt coverage increased in the period under review to 85.2 percent, well above our target of 50 percent. The interest coverage ratio also further improved, benefiting from the lower interest expense incurred.

### Financial position

The development of our financial position is indicated in detail in the consolidated statement of cash flows on page 28. At 1,122 million euros, cash flow from operating activities in the first nine months of 2011 was below the high comparative figure of the prior-year period (1,334 million euros). One of the factors causing the decrease was a rise in the outflow of funds attributable to net working capital. At 8.0 percent of sales, net working capital was 0.2 percentage points above the level of the prior-year period. However, an improvement in net working capital in the months of July through September had a positive effect on cash flow from operating activities.

Higher proceeds from the sale of non-current assets, predominantly from the disposal of our branded consumer goods business in India in the second quarter, benefited cash flow from investing activities. However, increased investments in property, plant and equipment compared to the first nine months of 2010 led to a higher net outflow.

The negative cash flow from financing activities (–611 million euros) was significantly lower than in the prior-year period (–1,425 million euros), despite the higher dividend payout. The allocation last year of liquid funds to marketable securities and time deposits, and also the liquid funds used to further strengthen our pension funds, were reported as cash outflows.

Liquid funds/marketable securities underwent an increase in value to 1,824 million euros (December 31, 2010: 1,515 million euros).

At 725 million euros, free cash flow was lower than the figure for the prior-year period (1,087 million euros) due to lower cash flow from operating activities and higher capital expenditures in property, plant and equipment.

### Capital expenditures

Investments in property, plant and equipment for continuing operations amounted to 263 million euros compared to 164 million euros in the first nine months of 2010. We spent 4 million euros on intangible assets (prior-year period: 8 million euros). A large part of these capital expenditures was attributable to the Adhesive Technologies and Laundry & Home Care business sectors. Around two thirds of the investment sum went into expansion and rationalization measures, including the introduction of innovative product lines and the structural optimization of our production and logistics activities. In regional terms, capital expenditures focused primarily on Western Europe, Eastern Europe and North America.

First-time consolidations and purchase price adjustments resulted in additions to non-current assets amounting to 52 million euros.

Acquisitions and divestments
In the third quarter, we spent 2 million euros acquiring outstanding non-controlling interests in Rilken Cosmetics Industry S.A., Athens, Greece. Effective September 30, 2011, we increased our shareholding to 70 percent with the purpose of acquiring 100 percent of the shares in the future. Neither the acquisitions and divestments made nor other measures and activities undertaken have resulted in changes in our business and organizational structures. For a detailed description of our organization and business activities, please refer to the information provided in our Annual Report 2010, page 26.

Employees
As of September 30, 2011, we had 47,790 employees (September 30, 2010: 48,151). The decrease is due both to the sale of our branded consumer goods business in India and the continuation of our restrictive hiring policy.

In accordance with our strategy, we continue to increase the number of employees in the emerging markets of Eastern Europe and Asia.

Research and development
Henkel Group expenditures on research and development in the first nine months of 2011 amounted to 311 million euros (adjusted for restructuring charges: 297 million euros), compared to 293 million euros (adjusted: 289 million euros) in the first nine months of 2010. Expressed as a proportion of sales, R&D expenditures remained constant at 2.6 percent (adjusted: 2.5 percent) versus the prior-year period.

The development of innovative products is of key importance to our business model. The research and development strategy described in our Annual Report 2010 (starting on page 59) has remained unchanged.

Outlook
Underlying economic conditions
Our view based on data provided by Feri EuroRating Services is that the world economy will grow by some 2.5 percent during 2011. The industrialized countries will only undergo moderate growth of around 1.5 percent while the emerging markets will, we anticipate, experience comparatively strong expansion amounting to 5.5 percent.

For the US economy and Western Europe, we expect the full year to bring growth of about 1.5 percent each. In Western Europe, growth of almost 3 percent in Germany will be diluted by smaller pluses of 0.5 to 1 percent in Italy and Spain. We expect Japan to register a decline in gross domestic product of around 0.5 percent for full fiscal 2011.

The emerging markets of Asia will, in our view, grow by some 7 percent. For Latin America, we expect growth to come in at 4.5 to 5 percent. Eastern Europe will, in our opinion, expand by 3.5 percent.

The global unemployment rate this year is likely to fall by around half a percentage point to 7.4 percent. We expect global inflation to be something above 4 percent.

We forecast that private consumption in 2011 will rise by around 2.5 percent worldwide. In the industrialized countries, consumers will only grow their spend by 1 percent, while that of the emerging markets can be expected to increase by a good 5 percent.

We foresee worldwide industrial production rising by around 6 percent. Western Europe's industry is likely to expand by some 4.5 percent, that of North America by around 4 percent; industrial output will be somewhat stronger in Asia (rise of 7.5 to 8 percent) and also in Eastern Europe (up by around 6 percent).

For the transport sector, electrical engineering, the electronics industry and metal processing, we forecast continuing rapid growth at rates of 7 to 8 percent per segment. By contrast, we expect no more than a moderate production increase of around 2.5 percent in the packaging industry. Global growth in the construction industry is likely to be even lower at 1.5 percent.
Opportunities and risks
We have identified major potential in the emerging economies. The regions concerned include, for Henkel, Asia (without Japan), Eastern Europe, Africa/Middle East and Latin America, where there are above-average growth opportunities from which we expect to benefit.

We likewise see opportunities in our research and development activities. We are constantly developing new and innovative products and problem solutions capable of providing our customers with added value. We have a well filled and balanced pipeline of medium-term and long-term innovation projects which we intend to bring onto the market in this and coming years in all three of our business sectors.

We see further progress arising from our strict ongoing focus on cost. The process we have implemented involves constantly examining and analyzing the prevailing status quo. From the ensuing results, we derive measures and solutions that enable us to reduce costs, adapt capacity and streamline our portfolio by removing marginal activities and disposing of smaller brands as appropriate. We likewise expect the planned further expansion of our shared service centers to make a major contribution to reducing costs.

Opportunities are also likely to emanate from the resolute pursuit and implementation of our three strategic priorities. These are described in detail under the heading “Strategy and financial targets for 2012” in our Annual Report 2010, pages 40 to 43.

We see risks for our consumer businesses arising particularly from a deteriorating consumer climate – as would ensue, for example, in the event of a hefty rise in unemployment. We also expect the intensity of competition to remain challenging, manifesting itself in persistent promotional pressure.

Risks for our Adhesive Technologies business sector lie in the possibility that the current market recovery will falter, leading to the failure of individual customers and suppliers.

For all three business sectors, further increases in raw material and packaging prices, in some cases substantial, also represent a risk, as do supply shortages with respect to certain raw materials, particularly those required by the Adhesive Technologies business sector. In addition, the effects on the global supply chain of the political turmoil in North Africa and also the environmental and nuclear power plant catastrophes in Japan are not yet fully assessable.

At the time of preparing this report, no risks in relation to future developments have been identified that might jeopardize the continuing existence of the company or of the Group as a going concern.

Further specific opportunities and risks are discussed in the sections dealing with the individual business sectors in our Annual Report 2010 in the relevant sections on pages 66 through 77.

Outlook for the Henkel Group 2011
Following the first three quarters, we are confident of again outperforming our relevant markets in terms of organic sales growth – i.e. sales adjusted for acquisitions/divestments and foreign exchange. We now expect an increase in organic sales of between 5 and 6 percent (previous outlook: around 5 percent).

We confirm our forecast for an adjusted\(^1\) return on sales (EBIT) of around 13 percent (2010: 12.3 percent) and for an increase in adjusted\(^1\) earnings per preferred share of around 10 percent (2010: 2.82 euros).

We base this guidance on anticipated increases of our selling prices and the ongoing adaptation of our structures to the constantly changing market conditions. Through these activities and the maintenance of our strict cost discipline, we intend to more than offset the effects of increased raw material costs on our earnings.

We also expect the following developments to materialize in 2011:

---

\(^1\) Adjusted for one-time charges/gains and restructuring charges.
• An increase in the overall price of raw materials, packaging, contract manufacturing and traded goods in the low teens percentage range
• A research and development ratio of around 2.6 percent
• Restructuring charges amounting to around 220 million euros (previous outlook: around 160 million euros)
• A financial result of about minus 160 million euros
• A tax rate of around 26 percent
• Investments in property, plant and equipment of below 400 million euros.

Sales and profits forecast 2012
Having firmly fixed our focus on pursuing the three strategic priorities formulated in 2008 and with the progress that we have made in their achievement, we have laid a solid foundation for the generation of future profitable growth.

Following the forecasts of Feri EuroRating Services, we now expect world economic growth in 2011 to be close to 3 percent, with a similar rate of expansion occurring in 2012.

On that basis, we will again be aiming in 2012 at achieving an organic sales growth rate of between 3 and 5 percent, therefore outperforming the markets of relevance to us. Due to the measures aimed at achieving our full business potential – both implemented and still outstanding – we are very confident of reaching our 2012 targets of 14 percent in adjusted return on sales (EBIT) and an increase of more than 10 percent in adjusted earnings per preferred share (EPS).

Subsequent events
After September 30, 2011, there were no notifiable events likely to materially affect the net assets, financial position or results of operations of the Group.

1) Calculated on the basis of units of 1,000 euros.
2) Including goodwill at cost prior to any accumulated amortization, in accordance with IFRS 3.79 (b).
3) Including goodwill at net book value.
4) Including for the first nine months of 2010 restructuring charges of 4 million euros disclosed for the last time under Corporate, arising from integration of the National Starch businesses.
Earnings per share
In calculating earnings per share for the period January through September 2011, we have included the standard dividend differential between ordinary and preferred shares for the full year of 2 eurocents (as stipulated in the Articles of Association), weighted on a proportional basis.

As of September 30, 2011, the Stock Incentive Plan had diluted the earnings per ordinary share and per preferred share by 1 eurocent each.

Changes in treasury shares
Treasury stock held by the corporation at September 30, 2011 amounted to 3,776,170 preferred shares. This represents 0.86 percent of the capital stock and a proportional nominal value of 3.8 million euros.

As a result of options exercised and lapsed under the Stock Incentive Plan, our treasury stock decreased during the period January through September 2011 by 259,395 preferred shares, representing a proportional nominal value of 0.3 million euros (0.06 percent of issued shares).

Accounting policies
The interim financial report and interim consolidated financial statements of the Henkel Group for the third quarter and the first nine months of the year have been prepared in accordance with section 37x (3) in conjunction with section 37w (2) of the German Securities Trading Act (Wertpapierhandelsgesetz – WpHG), in accordance with International Financial Reporting Standard (IFRS) as adopted by the European Union, and consequently in compliance with International Accounting Standard (IAS) 34 “Interim Financial Reporting.”

The same accounting principles have been applied as for the 2010 consolidated financial statements, with the exception of the accounting pronouncements recently adopted in 2011. These pronouncements do not exert any material influence on the presentation of the nine-month financial report. In order to further ensure a true and fair view of our net assets, financial position and results of operations, additional line items have been included and some line items have been renamed in the consolidated statement of income, the statement of comprehensive income, the consolidated statement of financial position, the statement of changes in equity and the consolidated statement of cash flows.

To simplify interim financial reporting, IAS 34.41 allows certain estimates and assumptions to be made beyond the scope permitted for annual financial statements, on condition that all material financial information is appropriately presented to enable a proper assessment of the net assets, financial position and results of operations of the company. In calculating taxes on income, the interim tax expense is determined on the basis of the estimated effective income tax rate for the current financial year.

The interim report for the first nine months, comprised of condensed consolidated financial statements and an interim Group management report, was duly subjected to an auditor’s review.
Scope of consolidation
In addition to Henkel AG & Co. KGaA as the ultimate parent company, the scope of consolidation as of September 30, 2011 includes seven German and 175 non-German companies in which Henkel AG & Co. KGaA has the power to govern financial and operating policy, based on the concept of control. This is generally the case where Henkel AG & Co. KGaA holds, directly or indirectly, a majority of the voting rights. Companies in which not more than half of the voting rights are held are fully consolidated if Henkel AG & Co. KGaA has the power, directly or indirectly, to govern their financial and operating policies.

Compared to December 31, 2010, four new companies have been included in the scope of consolidation and eight companies have left the Group. In addition, there have been five mergers. The changes in the scope of consolidation have not had any material effect on the main items of the consolidated financial statements.

Acquisitions and divestments
Effective January 1, 2011, we assumed control over Schwarzkopf Inc., Culver City, California, USA. Our share of the voting rights in the company is 100 percent. The purchase price paid was 42 million euros. The provisional difference corresponds to the purchase price paid. Liquid funds assumed of 1 million euros are disclosed in the cash flow statement under purchase of financial assets/acquisitions. Having a direct presence in the US hair salon segment will enable us to better exhaust the potential of this market.

In the third quarter, we spent 2 million euros acquiring outstanding non-controlling interests in Rilken Cosmetics Industry S.A., Athens, Greece. Effective September 30, 2011, we increased our shareholding to 70 percent with the purpose of acquiring 100 percent of the shares in the future.

At the end of January 2011, we disposed of our non-core TAED bleach activator business in Ireland for 4 million euros. On May 31, 2011, we sold our shares in Henkel India Limited, Chennai, India. The sale proceeds amounted to 29 million euros with a gain of 48 million euros. In the course of the divestment, bank liabilities amounting to 66 million euros were discharged. Effective June 30, 2011, we disposed of a non-core operation in the Adhesive Technologies business sector. The proceeds of the sale amounted to 13 million euros, with a gain of 9 million euros.

Statement of comprehensive income
Of the components included in other comprehensive income, deferred tax expenses relating to actuarial gains amount to 37 million euros (September 30, 2010: deferred tax income of 91 million euros) and deferred tax income from cash flow hedges amount to 2 million euros (September 30, 2010: deferred tax expense of 2 million euros).

Assets held for sale
The value of assets held for sale decreased by 13 million euros compared to the level as of December 31, 2010. The decrease is due to the transfer to the acquirer, effective January 11, 2011, of the assets disclosed under this heading relating to a portion of our building adhesives business in South Korea, and sale of assets attributable to various other companies of the Group. Moreover, assets of one company were reclassified as property, plant and equipment due to a reversal of the decision to sell.

Contingent liabilities
Operating lease obligations
Operating leases as defined in IAS 17 comprise all forms of rights of use of assets, including rights of use arising from rent and leasehold agreements. Payment obligations under operating lease agreements are shown at the total amounts payable up to the earliest date when they can be terminated. The amounts shown are the nominal values. At September 30, 2011, the payments due were as follows:

Voting rights, related party transactions
Henkel AG & Co. KGaA, Düsseldorf, Germany, has been notified that the share of voting rights of the parties to the Henkel share-pooling agreement at October 21, 2010 represented around 53.21 percent of the voting rights (138,240,804 votes) in Henkel AG & Co. KGaA.

Notes to the Group segment report
There have been no changes in the basis by which the segments are classified or in the presentation of the segment results as compared to the annual financial statements of December 31, 2010. For definitions of ROCE, operating assets and capital employed, please refer to our Annual Report 2010, pages 44 and 129.

Notes to the consolidated statement of cash flows
The main items of the consolidated statement of cash flows and the changes thereto are explained on page 20.
Independent review report

To Henkel AG & Co. KGaA, Düsseldorf:
We have reviewed the condensed interim consolidated financial statements – comprising the consolidated statement of financial position, the consolidated statement of income, the statement of comprehensive income, the statement of changes in equity, the consolidated statement of cash flows and selected notes – and the interim group management report of Henkel AG & Co. KGaA, Düsseldorf, for the period from January 1, 2011 to September 30, 2011 which form part of the nine-month financial report according to section 37x (3) in conjunction with section 37w (2) German Securities Trading Act (Wertpapierhandelsgesetz – WpHG).

The preparation of the condensed interim consolidated financial statements in accordance with those International Financial Reporting Standards (IFRS) applicable to interim financial reporting as adopted by the EU, and of the interim group management report in accordance with the regulations of the German Securities Trading Act applicable to interim group management reports, is the responsibility of the Company’s management. Our responsibility is to issue a report on the condensed interim consolidated financial statements and on the interim group management report based on our review.

We performed our review of the condensed interim consolidated financial statements and the interim group management report in accordance with the German generally accepted standards for the review of financial statements promulgated by the Institut der Wirtschaftsprüfer (IDW) and in supplementary compliance with the International Standard on Review Engagements 2410 (ISRE 2410). Those standards require that we plan and perform the review so that we can preclude through critical evaluation, with a certain level of assurance, that the condensed interim consolidated financial statements have not been prepared, in all material respects, in accordance with the IFRS applicable to interim financial reporting as adopted by the EU, and that the interim group management report has not been prepared, in all material respects, in accordance with the regulations of the German Securities Trading Act applicable to interim group management reports.

A review is limited primarily to inquiries of company employees and analytical assessments and therefore does not provide the assurance attainable in a financial statement audit. Since, in accordance with our engagement, we have not performed a financial statement audit, we cannot issue an auditor’s report.

Based on our review, no matters have come to our attention that cause us to believe that the condensed interim consolidated financial statements have not been prepared, in material respects, in accordance with the IFRS applicable to interim financial reporting as adopted by the EU, or that the interim group management report has not been prepared, in all material respects, in accordance with the regulations of the German Securities Trading Act applicable to interim group management reports.

Report of the Audit Committee
of the Supervisory Board

In the meeting of November 7, 2011, the Audit Committee was presented the interim financial report for the first nine months of fiscal 2011 and the report prepared by KPMG AG, Wirtschaftsprüfungsgesellschaft, on its review of the interim financial statements and the interim management report. The Audit Committee also received verbal explanations from the Management Board and KPMG pertaining to the above. The Audit Committee has approved and endorses the interim financial report.

This document contains forward-looking statements which are based on the current estimates and assumptions made by the executive management of Henkel AG & Co. KGaA. Forward-looking statements are characterized by the use of words such as expect, intend, plan, predict, assume, believe, estimate, anticipate, forecast and similar formulations. Such statements are not to be understood as in any way guaranteeing that those expectations will turn out to be accurate. Future performance and the results actually achieved by Henkel AG & Co. KGaA and its affiliated companies depend on a number of risks and uncertainties and may therefore differ materially from such forward-looking statements. Many of these factors are outside Henkel’s control and cannot be accurately estimated in advance, such as the future economic environment and the actions of competitors and others involved in the marketplace. Henkel neither plans nor undertakes to update forward-looking statements.
