

# **HENKEL ESG STATBOOK 2024**

PRELIMINARY NOTES

In this ESG Statbook, we show the progress of our ESG indicators over a five-year period.

The figures in the tables have been rounded up or down. As a result, the rounded figures in some of the rows in the tables may not add up to the totals as indicated.

The production-related data for 2024 were determined at all 161 Henkel production sites in 53 countries. This means the data represent 100 percent of our production volume.

The published employee indicators cover 99 percent of our employees as of December 31.

Updates in data: Where target-relevant or necessary for clarity, changes are highlighted and explained.

Updates of individual or cumulative values are made when greater than 1 percent of the value of the superordinate indicator (for example, total energy consumption), including the subordinate indicators (for example, bought-in energy consumption).

CONTENTS								
Environment (Regenerative Planet)	Climate	Climate Transition Plan	Biodiversity	Water	Resource In- & Outflows	Packaging	Further Environmental Indicators	Operational Incidents
Social (Thriving Communities)	Own Workforce	Occupational Health & Safety	DEI	Employee Engagement	SDG Contribution			
Governance (Trusted Partner)	Financial Indicators	EU Taxonomy	Production Volume & ISO	Value Added Statement	Supply Chain Transparency	Business Ethics

# COMPANY PROFILE

## BUSINESS MODEL

Henkel's business is organized in two business units: Adhesive Technologies and Consumer Brands. Our **Adhesive Technologies** business unit offers technologies for adhesives, sealants and coatings – for industrial applications and for consumers and craftsmen. Based on our technology portfolio, we provide customercentric solutions in our Mobility & Electronics, Packaging & Consumer Goods, and Craftsmen, Construction & Professional business areas.

In the **Consumer Brands** business unit, we focus on the two global business areas Laundry & Home Care and Hair, and on the Other Consumer Businesses area with its operations in selective markets. Our portfolio features laundry detergents and household cleaners, hair styling, hair colorants and hair care products for both the Consumer and Professional businesses, and body care products.

## SUSTAINABILITY APPROACH AT HENKEL

Sustainable business practices have been an integral part of our company culture for decades, and are also a central element of our vision of the future. Together with innovation and digitalization, sustainability forms the core of our corporate strategy, the Purposeful Growth Agenda.

Sustainability is fundamental for creating a competitive edge, enabling business growth and generating value for our business and industry customers, consumers and all of our stakeholders. **Our 2030+ Sustainability Ambition Framework** sets the frame for our global sustainability strategy, with clear ambitions and targets that we want to achieve in this decade. We will build on our particular strengths, such as the innovation of our business units, the comprehensive knowledge of our employees, as well as various contact points of our products and technologies with customers and consumers. We see our company as an important player and partner in society, and we intend to work with others to create fundamental change.

# TARGETS AND AMBITIONS

Our 2030+ Sustainability Ambition Framework sets the frame for our global sustainability strategy, with clear ambitions and targets in the three dimensions of Regenerative Planet, Thriving Communities and Trusted Partner.

- **Regenerative Planet:** We strive to achieve a circular economy, a net-zero future and the regeneration of nature.
- **Thriving Communities:** We actively contribute to people being able to lead a better life through our business and brands.
- **Trusted Partner:** We are committed to product quality and safety while ensuring business success with integrity.

The following overview shows a selection of the main ambitions and targets to advance our sustainability transformation.

While the ambitions generally embrace a long-term time horizon, we define them in concrete terms by setting medium-term and measurable targets.

			Achieved 2024
REGENERATIVE PLANET	CLIMATE	-42% absolute Scope 1 and 2 GHG emissions (2030; vs. 2021)	-41%
		-30% absolute Scope 3 GHG emissions (2030; vs. 2021)	-19%
		-90% absolute Scope 1, 2, 3 GHG emissions (2045; vs. 2021)	-20%
		-100 million tons of CO <sub>2</sub> with customers, consumers and suppliers (2016–2025)	>100 million
	CIRCULARITY	No plastic waste into nature	Ambition
		>30% share of recycled plastic (~50 % fossil-based virgin plastics) for all packaging of our consumer goods products (2025)	25%
		100% of packaging designed for recycling or reusability <sup>1</sup> (2025)	89%
		-50% production waste per ton of product (2025; vs. 2010)	-39%
		Circular use of production waste material (2030)	Ambition
	NATURE	Encourage the responsible use of our products to reduce water consumption	Ambition
		-35% water withdrawal per ton of product (2025; vs. 2010)	-23%
		Circular water use at key manufacturing sites (2030)	Ambition
		100% paper and cardboard materials recycled or sourced from sustainable origins (2025)	98%
		100% palm and palm kernel oil responsibly sourced and certified or externally verified (2025)	97%
THRIVING COMMUNITIES	EQUITY	Gender parity across all management levels (2025)	Ambition
	EDUCATION	Improve livelihoods of smallholder farmers and protection of nature	~39,700 smallholders
		Expand our community education programs and volunteering	Ambition
		Engage and empower all employees to take action for sustainability	Ambition
	WELLBEING	Improve 30 million lives globally (2010–2030)	Achieved since 2022
		Shape the future of work for our company and employees	Ambition
TRUSTED PARTNER	PERFORMANCE	+60% safer per million hours worked (2025; vs. 2010)	+47%
		Reach >90% of our employees with global health campaigns (each year)	>90%
		Each new product contributes to sustainability	Ambition
	TRANSPARENCY	Provide our customers and consumers with a comprehensive sustainability profile of our products (2025)	Method under development
		Become three times more efficient (2030; vs. 2010) – Factor 3	186%
	COLLABORATION	100% transparency and traceability for palm and palm kernel oil (2025)	95%
		100% responsible sourcing together with our partners	Ambition

<sup>1</sup> Excluding products where ingredients or residue may affect recyclability or pollute recycling streams.

# REGENERATIVE PLANET

We are on a journey toward an environmental transformation of our business model. To achieve this ambition, we intend to transform our processes, products and use of raw materials in the direction of a resource-efficient, net-zero future. We are focusing on climate change mitigation measures, a functional circular economy, and the protection of nature and biodiversity.

TOPIC	TARGETS AND AMBITIONS	2020	2021	2022	2023	2024
CLIMATE	-42% absolute Scope 1 and 2 GHG emissions (2030; vs. 2021)	New targets as of 2024				<b>-41%</b>
	-30% absolute Scope 3 GHG emissions (2030; vs. 2021)					<b>-19%</b>
	-90% absolute Scope 1, 2, 3 GHG emissions (2045; vs. 2021)					<b>-20%</b>
	-100 million tons of CO <sub>2</sub> with customers, consumers and suppliers (2016–2025)	> 55 million	> 68 million	> 78 million	> 89 million	<b>&gt; 100 million</b>
CIRCULARITY	No plastic waste into nature (Ambition) <sup>1</sup>	-	-	-	-	-
	>30% share of recycled plastic (-50% fossil-based virgin plastics) for all packaging of our consumer goods products (2025)	15%	16%	16%	20% <sup>2</sup>	<b>25%</b>
	100% of packaging designed for recycling or reusability <sup>3</sup> (2025)	89%	86%	87%	87%	<b>89%</b>
	-50% production waste per ton of product (2025; vs. 2010)	-38% <sup>2</sup>	-35% <sup>2</sup>	-38% <sup>2</sup>	-36% <sup>2</sup>	<b>-39%</b>
	Circular use of production waste material (Ambition 2030) <sup>1</sup>	-	-	-	-	-
NATURE	Encourage the responsible use of our products to reduce water consumption (Ambition) <sup>1</sup>	-	-	-	-	-
	-35% water consumption per ton of product (2025; vs. 2010)	-26% <sup>2</sup>	-26% <sup>2</sup>	-23% <sup>2</sup>	-23% <sup>2</sup>	<b>-23%</b>
	Circular water use at key manufacturing sites (Ambition 2030) <sup>1</sup>	-	-	-	-	-
	100% paper and cardboard materials recycled or sourced from sustainable origins (2025)	Indicator under development			96%	<b>98%</b>
	100% palm and palm kernel oil responsibly sourced and certified or externally verified (2025)	75%	93%	89%	96%	<b>97%</b>

<sup>1</sup> While the ambitions generally embrace a long-term time horizon, we define them in concrete terms by setting medium-term and measurable targets.

<sup>2</sup> Data has been adjusted as part of our data review. | <sup>3</sup> Excluding products where ingredients or residue may affect recyclability or pollute recycling streams.

CLIMATE	UNIT	2020	2021	2022	2023	2024 REFERENCE	
Our greenhouse gas (GHG) inventory encompasses Scope 1, 2 and 3 emissions. Scope 1 and 2 emissions cover direct and indirect emissions from our operations. Scope 3 covers emissions that originate in our upstream and downstream value chain. We follow the GHG Protocol, the worldwide-guiding accounting framework for GHG emissions, which categorizes Scope 3 emissions into fifteen categories based on the cause of these emissions. Following the guidelines of the SBTi Corporate Net-Zero Standard, our net-zero targets and GHG inventory cover all Scope 3 categories except the category of use phase emissions of sold products.

1 Data is not meaningful as the base year representation refers only to the scope of our SBTi targets and does not include the category (3.11) for emissions from the indirect use phase. Details of our SBTi targets can be found in the section "Targets related to climate change mitigation and adaptation". | 2 We published our new SBTi targets in 2024 with the base year 2021. Due to methodological/scope changes, we don't have Scope 3 data comparable/available for 2022 and 2023. | 3 The investments taken into account for calculating the emissions for the year 2024 relate to the previous year. In the base year 2021, the investments from the same year were used. | 4 The reported net revenue is disclosed under the high climate impact sector of the processing industry. | 5 The emissions metrics used to calculate the metric are net values that were determined by giving consideration to the following assumptions. Emissions from the generation of energy to be sold to third parties, from vehicle fleets, from refrigerant and process emissions, and from non-production locations are not included in these numbers. Emissions are calculated using the market-based method in accordance with the GHG Protocol. The reporting on the intensity targets with base year 2017 considers all Scope 1 and Scope 2 related business activities from 2019, excluding business activities in Russia. This excludes emission sources that were reported in separate lines (vehicle fleets that are reported under business travel, biogenic emissions that are reported in addition to the Scopes) and various emission factors (CO<sub>2</sub>, current targets for Scope 1 and 2 use CO<sub>2</sub>e). | 6 Reporting on the 2017 base year intensity target takes into account all Scope 3.1-relevant business activities in 2021, excluding those in Russia, and was extrapolated based on the activities in 2021. This only includes sources of emissions from raw materials and packaging materials purchased in this specific year. This corresponds to the definition of the Sustainable Finance Framework (October 2021). | 7 Recalculated to use updated emission or conversion factors, including CO<sub>2</sub>e instead of CO<sub>2</sub>. | 8 Updated to include data for the vehicle fleet and non-production locations. | 9 Updated to include refrigerant and process emissions. | 10 Adjusted as part of our data review. | 11 Updated to include emissions from external sale. | 12 Target has been replaced by new SBTi target, we only disclose 2024 values for full transparency during the shift.

CLIMATE	UNIT	BASE YEAR 2021	N-1 = 2023	N = 2024	ANNUAL % TARGET/ PREVIOUS YEAR	REDUCTION COMPARED TO BASE YEAR (%N/BASE YEAR)	2030 TARGET	2045 TARGET	ANNUAL % REFERENCE TARGET/ BASE YEAR
---------	------	-------------------	------------	----------	--------------------------------------	---	-------------	-------------	--

Setting a science-based target for this transformation is only the first step of our net-zero roadmap. Our Climate Transition Plan serves as a key element of our climate change mitigation approach. It outlines our corporate near-term, and net-zero targets and emission reduction activities to achieve these targets, as well as our governance and delivery mechanisms to implement our net-zero transformation.

BIODIVERSITY AND ECOSYSTEMS	UNIT	2020	2021	2022	2023	2024	REFERENCE
-----------------------------	------	------	------	------	------	------	-----------

Henkel acknowledges the importance of biodiversity and is committed to protecting and restoring biodiversity as part of its strategic orientation, with a particular focus on forests, land and water. In addition to applying these principles to the activities at our own sites, we also promote the responsible management of raw materials and the use of ingredients based on renewable raw materials. The focus is particularly on the responsible sourcing of palm (kernel) oil and timber products, which have been identified as critical raw materials in relation to deforestation.

WATER	UNIT	2020	2021	2022	2023	2024	REFERENCE
-------	------	------	------	------	------	------	-----------

Water plays a crucial role along our value chain. We use water as a part of our production processes and as an ingredient in our products. Many of our products also require water during their use phase. Water consumption and water withdrawal throughout the value chain represent material environmental impacts for Henkel.

WATER METRICS							
Total water consumption <sup>1</sup>	m <sup>3</sup>	4,633,624	4,814,511	4,623,457	4,180,480	3,858,063	CSRD E3-4 _AR 32

Water consumption in areas at water risk	m <sup>3</sup>					856,073	CSRD E3-4 _AR 32
Water consumption in areas at water risk, thereof in areas of water stress	m <sup>3</sup>					808,381	CSRD E3-4 _AR 32
Water consumption in areas of water stress, but no increased overall water risk	m <sup>3</sup>					954,297	CSRD E3-4 _AR 32
Volume of wastewater <sup>1</sup>	m <sup>3</sup>	3,353,469	3,170,514	3,147,833	2,602,993	2,869,562	Other
River basins, where company's operational sites are located in	Number	Newly reported indicator since 2024				111	CSRD E3-4 _28e

1 Data has been adjusted as part of our data review. Non-production sites have been included.

2 The metric reported as "water consumption" in past sustainability reports is now reported as "water withdrawal".

3 Water withdrawal from surface waters, groundwater and water from third parties for own production.

RESOURCE IN- & OUTFLOWS	UNIT	2020	2021	2022	2023	2024	REFERENCE
-------------------------	------	------	------	------	------	------	-----------

Effective protection of natural resources requires decoupling economic growth from the consumption of finite, natural and fossil resources and development to a circular economy. Henkel is working on the transition to a circular economy, aiming to align resource inflows and outflows with circular principles. Reporting resource inflow and outflow indicators include resource use and waste.

#### METRICS FOR RESOURCE INFLOWS

##### Total weight of products and technical and biological materials used during the reporting period

Total weight of products and technical and biological materials used during the reporting period	Metric tons	Newly reported indicator since 2024	12,700,562	CSRD E5-4_31a
Percentage of biological materials and biofuels used for non-energy purposes	%		3	CSRD E5-4_31b
Absolute weight of secondary reused or recycled components, secondary intermediary products and secondary materials used in the production of the Company's products and services (including packaging)	Metric tons		226,179	CSRD E5-4_31b
Percentage of secondary reused or recycled components, secondary intermediary products and secondary materials used in the production of the Company's products and services (including packaging)	%	Newly reported indicator since 2024	2	CSRD E5-4_31c

#### METRICS FOR RESOURCE OUTFLOWS

<b>Total amount of waste generated</b>	Metric tons	126,789	137,883	146,492	151,255	131,708	CSRD E5-5_37a
Thereof, construction and demolition waste		17,670	22,923	35,118	46,710	35,040	Other

##### Waste diverted from disposal, with a breakdown between hazardous waste and non-hazardous waste and a breakdown by recovery operation types

<b>Non-hazardous waste diverted from disposal</b>	Metric tons	46,191	54,314	58,276	63,148	50,406	CSRD E5-5_37b
Non-hazardous waste diverted from disposal due to preparation for reuse	Metric tons	n.a.	n.a.	n.a.	n.a.	n/a	CSRD E5-5_37b i
Non-hazardous waste diverted from disposal due to recycling	Metric tons	42,244	49,726	54,863	60,384	43,942	CSRD E5-5_37b ii

<b>Hazardous waste diverted from disposal</b>	Metric tons	4,925	6,156	5,764	9,784	7,987	CSRD E5-5_37b
Hazardous waste diverted from disposal due to preparation for reuse	Metric tons	n.a.	n.a.	n.a.	n.a.	n/a	CSRD E5-5_37b i
Hazardous waste diverted from disposal due to recycling	Metric tons	3,223	4,242	3,632	7,879	2,588	CSRD E5-5_37b ii
Hazardous waste diverted from disposal due to other recovery operations	Metric tons	1,703	1,913	2,132	1,905	5,398	CSRD E5-5_37b iii

##### Waste directed to disposal by waste treatment type and the total amount summing all three types, with a breakdown between hazardous waste and non-hazardous waste

<b>Non-hazardous waste directed for disposal</b>	Metric tons	51,641	55,229	55,184	57,230	50,526	CSRD E5-5_37c
Non-hazardous waste directed for disposal through incineration	Metric tons	17,174	21,897	21,421	23,440	30,970	CSRD E5-5_37c i
Non-hazardous waste directed for disposal through landfill	Metric tons	30,189	28,830	26,482	20,671	15,571	CSRD E5-5_37c ii
Non-hazardous waste directed for disposal through other types of disposal	Metric tons	4,278	4,502	7,281	13,120	3,984	CSRD E5-5_37c iii
<b>Hazardous waste directed for disposal</b>	Metric tons	24,032	22,184	27,245	21,094	22,789	CSRD E5-5_37c
Hazardous waste directed for disposal through incineration	Metric tons	19,620	19,489	19,275	18,372	19,864	CSRD E5-5_37c i
Hazardous waste directed for disposal through landfill	Metric tons	2,407	1,287	793	1,271	1,128	CSRD E5-5_37c ii
Hazardous waste directed for disposal through other types of disposal	Metric tons	2,005	1,409	7,177	1,451	1,797	CSRD E5-5_37c iii

##### Non-recycled waste

Non-recycled waste	Metric tons	81,322	83,914	87,973	81,261	85,177	CSRD E5-5_37d
Percentage of non-recycled waste	%	64	61	60	54	65	CSRD E5-5_37d

##### Hazardous waste

Total amount of hazardous waste	Metric tons	28,957	28,340	33,008	30,878	30,776	CSRD E5-5_39
Total amount of radioactive waste	Metric tons	n/a	n/a	n/a	n/a	n/a	CSRD E5-5_39

PACKAGING	UNIT	2020	2021	2022	2023	2024 REFERENCE
<p>Eliminating, reducing and – where this is not possible – recovering and recycling packaging materials, especially for our consumer goods related to our business unit Consumer Brands, is the best way to minimize waste and the related negative environmental effects. Our goal is to reduce the amount of packaging material we use to a minimum without compromising the quality, performance or safety of our products. Our mission is to include materials from sustainable sources and to design packaging so that it can be reused as raw materials for new products in order to close the material loop. In our Adhesive Technologies business unit, we also pursue the approach of using our high-quality, innovative packaging adhesives to support other companies in their implementation of a circular economy. To accomplish this, we are focusing on innovative solutions that facilitate the recycling of materials and also the separation of materials, so that products and product parts can be repaired, reused and refurbished.</p> <p><a href="#">Learn more</a></p>

\*Data has been adjusted as part of our data review.

1 Excluding products where ingredients or residue may affect recyclability or pollute recycling streams. | 2 This calculation is based on a detailed evaluation of packaging materials placed on the market. In 2023, there was a change in methodology from using purchased data to sales data, among other things. In doing so, the previous year's data remain comparable with this year's footprint data. Additionally, we use an approximation based on product quantities sold, where required.

FURTHER ENVIRONMENTAL INDICATORS	UNIT	2020	2021	2022	2023	2024 REFERENCE
----------------------------------	------	------	------	------	------	----------------

Henkel recognizes its impact on air pollution, resulting e.g. from its energy demand. To ensure that relevant environmental impacts associated with Henkel business processes are analyzed and reported, and that measures for optimization are initiated, each of our facilities must monitor and record a defined set of environmental data concerning air emissions.

DUST EMISSIONS						
----------------	--	--	--	--	--	--

Dust emissions <sup>1,2</sup>	Metric tons	242	231	232	206	160 Other

SULFUR DIOXIDE EMISSIONS						
--------------------------	--	--	--	--	--	--

Sulfur dioxide emissions <sup>2</sup>	Metric tons	52	45	76	55	91 Other
---------------------------------------	-------------	----	----	----	----	----------

NITROGEN OXIDE EMISSIONS						
--------------------------	--	--	--	--	--	--

Nitrogen oxide emissions <sup>2</sup>	Metric tons	352	325	338	317	430 Other
---------------------------------------	-------------	-----	-----	-----	-----	-----------

1 The values include aerosols, since these are difficult to distinguish from dust during measurements.  
2 New methodology: All values calculated through emission factors, based only on energy consumption.

## OPERATIONAL INCIDENTS AND ENVIRONMENTAL VIOLATIONS

Henkel openly reports operational incidents when the consequences include at least one of the following:

- Endangerment of the neighborhood or the environment.
- Tangible losses of more than 500,000 Euros.
- A high level of public reaction.

Furthermore, Henkel transparently reports on environmental violations where the resulting fine exceeds 10,000 Euros.

The measures and corrective actions initiated as a result are also disclosed.

### OPERATIONAL INCIDENTS

	<p>In December 2024, a third party contractor suffered a fatal electric shock while using a high-pressure water device during cleaning activities. The incident occurred at a HCB production site. Immediate actions were taken, including the blocking of all jet washers and initiating a safety stand-down.</p> <p><b>Measures initiated:</b> Henkel was in close contact with the family of the employee and with the authorities to support the investigation of the case. Subsequent measures involved conducting a comprehensive risk assessment and management of change training for the site. Preventive actions were implemented, including the addition of engineering controls to enhance safety.</p>
2024	<p>In August 2024 at our Adhesive production plant in Salisbury, USA, a neighbouring company's 500,000 gallon fire water storage tank collapsed, releasing a surge of water and debris that caused significant property damage across the Henkel site. No Henkel employees were injured, though several contractors sustained minor injuries. The force of the water pushed an articulating boom lift into a nearby natural gas main, resulting in a gas leak and prompting a site-wide evacuation. Extensive damage occurred in multiple areas of the plant, resulting in contamination of a local creek with a water/diesel mixture. All production was ceased, damage assessments were carried out, and a clean-up contractor was engaged to contain and clean the contaminated area.</p> <p><b>Measures initiated:</b> An investigation team and crisis management team were assembled to determine the cause of the rupture and oversee the resumption of production. Repairs and replacements of the damaged facilities are underway, with enhanced measures implemented to ensure routine tank inspections and prevent future incidents.</p>
2023	<p>In May 2023, a fatal accident involving a temporary employee occurred at our detergent factory in Beirut, Lebanon. The employee was fatally injured while attempting to use a freight elevator for raw materials. The family and authorities were notified promptly.</p> <p><b>Measures initiated:</b> Henkel was in close contact with the family of the victim and cooperated with the local authorities in the accident investigation. All elevators at the site were checked for safety before resuming operation. Safety inspections of the elevators were carried out at all Henkel production sites.</p>
	<p>In June 2023, a sales employee in Poland had a fatal accident while driving to a customer by car. No other vehicles or people were involved in the accident.</p> <p><b>Measures initiated:</b> Henkel was in close contact with the family of the employee and with the authorities to support the investigation of the case.</p>
2022	There were no operational incidents in 2022.
2021	There were no operational incidents in 2021.

## OPERATIONAL INCIDENTS AND ENVIRONMENTAL VIOLATIONS

2020	<p>A fire broke out in the shredder plant at the waste disposal center on the Düsseldorf, Germany, site in May 2020. It occurred during the shredding of plastic containers that had been emptied of residual material. The site fire service was alerted by the automatic fire alarm system and by an employee. Together with Düsseldorf's professional fire department, which was also alerted, it extinguished the fire in a short period of time. No personal injuries were sustained. The firefighting water was properly disposed of in consultation with the relevant authorities.</p> <p><b>Measures initiated:</b> The waste disposal process was examined and employees working in waste-generating operations at the Düsseldorf site were trained in proper waste disposal. In addition, the shredding process was assessed to see how safety could be improved. The resulting recommendation is that any new shredder should be designed with an extinguishing system in mind and implemented as such.</p>
	<p>In July 2020, a fatal accident involving a temporary employee occurred at our detergent factory in Ibadan, Nigeria. The employee was fatally injured inside a soap mixing machine when he attempted to access it during normal operation. The machine was immediately stopped with the emergency shut-off switch. Family and authorities were notified promptly. The causal analysis revealed a failure of the machine safeguard.</p> <p><b>Measures initiated:</b> Henkel was in close contact with the family of the victim and cooperated with the Nigerian government in the accident investigation. All machinery at the Nigerian site was checked for safety before operations were resumed. A safety inspection was also conducted on all machines at our sites with similar production areas.</p>
	<p>Air contamination occurred due to an overpressure incident at our Laundry &amp; Home Care production site in St. Louis, USA, in May 2020. A raw material caused overpressure in the facility's air duct system while a truck was being unloaded. All the processes were shut down and repair work was started promptly. No personal injuries occurred.</p> <p><b>Measures initiated:</b> After the factory's air ducts had been decontaminated and before operations were resumed, all the containers at the sulfonation facility were inspected for possible damage. In addition, Henkel took preventive measures at all sites worldwide with similar production processes, with the aim of preventing similar incidents in the future.</p>
	<p>A fire occurred in March 2020 at our adhesives plant in Bopfingen, Germany, during production of a hotmelt adhesive, causing extensive property damage. The building was evacuated once the fire alarm had been set off and the facility had been shut down as an emergency measure. The fire service was able to bring the fire under control after a short period of time. Further damage was prevented by the safety equipment installed. The resulting extinguishing water was properly disposed of in coordination with the responsible authorities.</p> <p><b>Measures initiated:</b> An investigation team and a crisis management team were formed to establish the cause of the fire, while coordinating the smooth resumption of production at a different site.</p>

## ENVIRONMENTAL VIOLATIONS

OCCUPATIONAL HEALTH & SAFETY	UNIT	2020	2021	2022	2023	2024 REFERENCE
------------------------------	------	------	------	------	------	----------------

Occupational safety within the company and along the value chain is a top priority for us. We remain focused on our long-term objective of zero accidents and want to improve our occupational safety by 60 percent by the end of 2025 compared to 2010. We have anchored this overarching goal as a key performance indicator in our sustainability strategy. In 2024, we recorded 0.6 occupational incidents per million hours worked by our employees. This is an improvement of 47 percent over the base year 2010. 100 percent of the company's workforce is covered by our health and safety management system, which is based on legal requirements and recognized standards. We achieve this coverage by establishing it as a minimum requirement for all our locations through globally applicable SHE standards. However, not only the physical health of our employees is important to us, but also their mental health.

EMPLOYEE ENGAGEMENT	Unit	2020	2021	2022	2023	2024 REFERENCE
---------------------	------	------	------	------	------	----------------

Corporate citizenship firmly anchored in our corporate culture Corporate citizenship has been an integral part of our corporate culture ever since the company was established by Fritz Henkel in 1876. Together with our employees, pensioners, customers, consumers, partners and charitable organizations, we are committed to making a lasting contribution to society worldwide, above and beyond our business activities.

Henkel's commitment is based on three pillars: Volunteer engagement by our employees, partnerships with charitable organizations, and emergency aid with a focus on natural disasters. Our overarching goal is to reach 30 million people through our social engagement activities by 2030 (base year 2010). We exceeded this in 2022 already. This is primarily due to our contribution to combating the global COVID-19 pandemic and our involvement in the Ukraine crisis.

Time off from work for employee-initiated projects	Days	71 <sup>1</sup>	174 <sup>2</sup>	442	512	383 Others
Donations (financial and product donations, not counting time off)	Thousand euros	29,922 <sup>1</sup>	23,815 <sup>1</sup>	12,808	12,840	10,756 Others

<sup>1</sup> The total amount of donations in 2020 and 2021 was significantly higher than in previous years. This is attributable to our contribution to the fight against the global COVID-19 pandemic.

<sup>2</sup> Due to the specific circumstances in 2020 and 2021, employee projects required fewer days off from work than in the prior years. Generally speaking, employees may request up to five days off from work per year for volunteer activities.

SDG CONTRIBUTION	Unit	2020	2021	2022	2023	2024 REFERENCE
------------------	------	------	------	------	------	----------------

Henkel supports the implementation of the 17 Sustainable Development Goals (SDGs) that were adopted by the 193 United Nations Member States in September 2015. As a company, we are convinced that the goals provide a shared focus that can empower collaborative action and will accelerate progress toward sustainability. Sustainable consumption, packaging and plastics, combating climate change, water, human rights, equal opportunities and education are important topics for our work. By continuously reviewing our company's goals and initiatives, we ensure that these are aligned with the SDG priorities that are relevant for us. We support the SDGs through our many years of intensive work on a wide range of sustainability issues, as well as through our broad product portfolio and our presence in a large number of markets. In the context of our social commitment, for example, we track the percentage of projects we support that contribute to the achievement of the SDGs. The following examples highlight our contribution to the implementation of the global development goals and demonstrate the range of our activities.

MANAGEMENT SYSTEM CERTIFICATION	Unit	2020	2021	2022	2023	2024 REFERENCE
---------------------------------	------	------	------	------	------	----------------

Globally uniform standards for Safety, Health, and Environment (SHE), together with integrated management systems, provide the basis for our worldwide optimization programs. Our SHE Standards and our Social Standards apply to all sites. Our management systems ensure that these standards are implemented consistently across our global production network and at all sites. This is based on the continuous training of our employees. We carry out regular audits at our production and administration sites, and at our subcontractors and logistics centers, to verify compliance with our codes and standards. All audit results, including the monitoring of our SHE and Social Standards, are included in the Internal Audit department's annual report to the Henkel Management Board. We have our management systems externally certified at the site level wherever this is expected and recognized by our partners in the respective markets.

## EXTERNAL CERTIFICATION OF OUR MANAGEMENT SYSTEMS

VALUE ADDED STATEMENT	UNIT	2020	2021	2022	2023	2024 REFERENCE
-----------------------	------	------	------	------	------	----------------

Henkel operates 161 production sites in 55 countries worldwide, invests in research and development, maintains close cooperation with our suppliers, and contributes to economic development in our target markets. As an employer, we create jobs in industrial countries, as well as in emerging and developing economies, and we generate purchasing power through wages and salaries. The taxes and levies we pay help to finance communities and support public infrastructure.

The value added statement shows that most of the generated sales flow back into the global economy. In 2024, the largest share of the value added – 57.1 percent – went to our employees in the form of salary and pension benefits. Central and local governments received 10.6 percent in the form of tax revenues. Lenders received 3.1 percent in the form of interest income. We distributed 12.3 percent of the value added as dividends to our shareholders. The value added remaining in the company is available for investments in future growth.

SUPPLY CHAIN TRANSPARENCY	UNIT	2020	2021	2022	2023	2024 REFERENCE
---------------------------	------	------	------	------	------	----------------

As part of our supplier management approach, we are also working to improve the transparency and traceability of our upstream supply chains. We see this as the key to ensuring sustainable agricultural practices and fair working conditions, as in the palm oil industry, for example. This is why Henkel is a member of the cross-industry initiative Action for Sustainable Derivatives, in which companies are working toward the shared goal of generating more transparency in the palm (kernel) oil value chain. The percentage of palm oil, palm kernel oil and their derivatives traceable to the refinery, mill or plantation is determined by ASD. This metric is reported with a one-year delay, as the analysis and verification of data are completed annually in the third quarter for the previous year.

VALUE CHAIN REPORT <sup>1</sup>						
Transparency and traceability for palm and palm kern	%	75	84	89	89	95 CSRD E4-4_31, MDR-T_80j, AR 24, AR 25, AR 26
Traceability to refinery	%	Newly reported indicator since 2024				95 CSRD E4-4_31, MDR-T_80j, AR 24, AR 25, AR 26
Traceability to mill	%	75	84	89	89	94 CSRD E4-4_31, MDR-T_80j, AR 24, AR 25, AR 26
Traceability to plantation	%		42	50	52	65 CSRD E4-4_31, MDR-T_80j, AR 24, AR 25, AR 26

1 The data for a year are based on the supplier data for the prior year.

Henkel is strongly committed to corporate governance and corporate compliance on both a local and global level. Responsible management processes, compliance with many different legal requirements and cultural sensitivity are cornerstones to being successful in our international markets. Improper conduct is never in Henkel’s interest. The Management Board and senior management circles at Henkel all subscribe to this fundamental principle. Improper conduct undermines fair competition and damages our trustworthiness and reputation. Our employees attach great importance to a correct and ethically impeccable business environment. We react forcefully to violations of laws, codes and standards.
