- **Scope**: All electricity Henkel directly procured, directly addressing emissions from the generation of procured electricity (Scope 2 quality criteria of the GHG Protocol Scope 2 Guidance for Energy Procurement).
- **Baseline**: Not applicable. The target is absolute and measured as a percentage. The measurement is not based on a reference value or reference year.
- **Target alignment**: The target supports Henkel's SBTi-aligned climate strategy by strengthening its electricity use activities driving the implementation pathway of the Scope 1 & 2 Science-based Targets initiative (SBTi)-aligned target.
- **Progress information**: Not applicable for reporting year 2025, since this target was newly introduced for the reporting year 2026. Progress information on the new target will be shared as part of Henkel's Annual Report for the reporting year 2026.
- **Main implementation pathway**: For the electricity required in our operational processes, Henkel aims to transition to 100% renewable sources. To do so, Henkel focuses on its electricity procurement through key technological levers and investments:
    - **Renewable electricity sourcing**: Procurement of renewable electricity through Power Purchase Agreements (PPAs), eco tariffs and "International Renewable Energy Certificates" (I-RECs) in line with GHG Protocol Scope 2 Guidance.
    - **Renewable electricity deployment**: Installation of, for example, solar panels and biomass boilers.
    - **Details can be found** in Henkel's Climate Transition Plan and in Henkel's Sustainability Statement 2025.
- **Allocation of resources**: The implementation of Henkel's climate targets is supported by expected additional operating expenditures of EUR 30–50 million p.a. (2026) and EUR 75–400 million p.a. (2027–2030).
- **Governance and steering**: Progress is overseen through Henkel's sustainability governance framework, including the Management Board, Sustainability Council and Supervisory Board Sustainability Committee.
- **External assurance**: The reported information underlying this target will be included in Henkel's Sustainability Statement 2026 and is subject to annual external limited assurance.

Henkel Climate Target Key Facts

Source 100% of our electricity from renewable sources by 2030.
